

The Folk of Yore

More than anything else, perhaps, the four books of **The Folk of Yore** are about interconnectedness, essential to grasp if we are to reach true balance and harmony with each other and with Nature. We are in the midst of great change. Many crises and dangers loom. How will we deal with them? Will we remain immersed in fear, perceiving those who seem different as hateful? Will we continue to self-servingly exploit the planet and enter into a feverish battle with Mother Earth for survival? Or will we experience a Great Shift in consciousness? Will we finally pass from an age of fear and separatism to one of Love and interconnectedness? How will you participate? These books may help reveal answers already within you.

Symbol for Mother Earth

The Folk of Yore blurs the line between fiction and reality in a way that draws the reader into the story and the story into the life of the reader. So much of it seems real. Perhaps it is. Some seems unreal. Perhaps it isn't.

The Society of Folk are beings of light from an 11th dimensional realm pervaded with pure Love. They distill Love into liquid jewels of dew and deliver them daily to Mother Earth, infusing them into the planet's innocents: Her plants, trees, rocks, soils, and waters. In this way, the Folk surround us with pure Love at a time when we are incapable of accepting and receiving it directly. Their purpose is to help restore mankind's capacity for unconditional Love and engender respect and reverence for all life. So is the purpose of these books.

The Books

Sacred Mission: A Call to Action is a transcription of journals written by Dr. Aubrey Manning, a tenured professor of environmental science. Discovering a connection between science and spirituality, Dr. Manning integrated predictive computer modeling with ancient Folk prophecies. This expanded insight proved to be the key to revealing not only answers she has sought for years, but also an imminent catastrophe that must be brought to the world's attention. *Sacred Mission* is her attempt to bring this knowledge to you. It is your call to action.

The Passageway

Sacred Memories: A Journey of Destiny was originally written by Auriel of Darluse Wood, a parchment maker and visionary who lived in the south of England at the beginning of the 7th century. It was bequeathed to Dr. Manning and is a source of Folk prophecies used in her work. Auriel was chosen by the Folk to visit their realm. *Sacred Memories* is a chronicle of his experiences in Folk Space, including a Royal Council at which the principle speaker was Mother Earth herself. Through Auriel's writing, She speaks to you.

The Divine Mind

The **Book of Symbols** is the fundamental source of all Folk prophecy. Written in their geodimensional language of mandala-like designs, it has no words as we would know them. The *Book of Symbols* contains all the history and mysteries of the Society of Folk. Each Symbol is holographic in nature, with multiple layers of information encompassing all time, all space, and all dimensions.

Known and Knowable is a compilation in several volumes of intuitive interpretations of Folk Symbols written by Dr. Manning. It offers a gentle prod toward remembering what is already known and knowable to every human being.

All books are available in paperback. *Sacred Mission*, *Sacred Memories* and the *Book of Symbols* are available on Kindle. Purchases can be made:
